FACIAL PLASTIC
SURGERY

Dear Patient,

I have mixed emotions writing to inform you that I have retired from my facial plastic surgery practice as of June 28, 2024. Over the past few months, many of my patients have become aware of this during visits to the office. The transition is now completed and I am sharing this information to the rest of my patients.

It was important to me that the person taking over my practice was not only an extremely talented facial plastic surgeon, but someone patients could trust to best serve their interests. I wanted to recruit a facial plastic surgeon who had training and experience in the latest proven surgical techniques in facial plastic and reconstructive surgery. These attributes were confirmed when I had the opportunity to observe Dr. Lucas Bryant during a facelift procedure.

I've had the pleasure of working closely with Dr. Bryant and his staff over the past few months to ensure a seamless transition. For the patients who have trusted me to inject Botox, Dysport, and other various fillers that I use, I wanted them to be comfortable with an injector who shares my philosophy of conservative treatment principles. Many of you have met Dr. Bryant's team already and I have complete confidence they will provide the same results that you have experienced with me. All patient records are available upon request.

I want to express my sincere gratitude for the trust and confidence you have placed in me over the years. It has been an honor to be your physician and surgeon, and I will always cherish our relationship.

Sincerely,

Larry C. Young M.D.

Refine

Facial Plastic Surgery
and Aesthetics —

Dear Future Refine Patient,

My name is Dr. Lucas Bryant and it is a great honor to introduce myself as the new steward of Dr. Young's esteemed practice. As a double board-certified facial plastic surgeon, I have deep and profound respect for the legacy of excellence established by Dr. Young.

The Refine team and I are qualified and committed to upholding the highest standards of care and innovation in the field of facial plastic surgery and aesthetics. I am honored to continue the tradition of personalized and comprehensive care that has been a hallmark of Dr. Young's practice of 41 years.

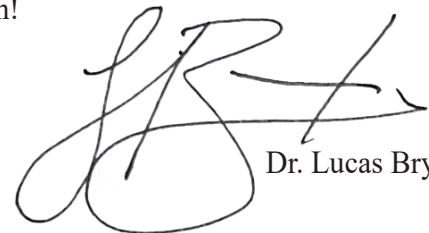

With a passion for refining natural beauty, I look forward to continuing the tradition this practice is known for. My team and I are here to serve you highest standards of expertise and compassion, ensuring your journey towards self-confidence and rejuvenation is both rewarding and fulfilling.

As part of my dedication to excellence, I have taken many missions trips to places such as Colombia and Ecuador, providing pro-bono reconstructive surgery to trauma patients and those born with defects such as ear deformity and cleft lip.

From a professional perspective, I have been an invited speaker both nationally and internationally. I have written multiple book chapters as well as academic papers on the subjects of facial plastic surgery. While we are based here in Nashville, we regularly see and treat patients from all over the United States as well as international patients. As a member of the medical honor society alpha omega alpha, and elected by my peers as a Castle Connolly Top Doctor, my commitment to exceed your expectations is firm.

I will be personally available for treatments, continuing the legacy of physician based care Dr. Young has established. However, our team has also grown to include additional highly skilled and qualified aesthetic providers available to you as well. I trust them implicitly. They are trained and supervised by myself.

If you have any questions, hesitations, or are ready for your next treatment, please reach out to either our Nashville or Mt. Juliet location. I look forward to meeting with you soon!

Dr. Lucas Bryant
